Printed in Great Britain

Contents of Volume 82

Number 1, 7 January 1980

SHEARS, S. B., The Thyroid Gland and the Liver Mitochondrial Protonic Electrochemical Potential Difference: A Novel Hormone Action? 1

KAM, Z., The Reconstruction of Structure from Electron Micrographs of Randomly Oriented Particles 15

JERZMANOWSKI, A. and STARON, K., Mg^{2+} as a Trigger of Condensation–decondensation Transition of Chromatin During Mitosis 41

CHAPAIS, B. and SCHULMAN, S. R., An Evolutionary Model of Female Dominance Relations in Primates 47

ANGULO, J. J., SMITH, T. L., TSOKOS, J. O. and TSOKOS, C. P., Population-dynamics Models and a Sequential Test in the Analysis of the Influence of a Household Setting on the Spread of *Variola minor* 91

SLACK, J. M. W., A Serial Threshold Theory of Regeneration . 105

BARTHA, F., On the Criterion of Instability for Positive Feedback Control Systems 141

GLICK, B. R., A Molecular Model of Peptide Chain Propagation 149

CHILDRESS, S. and KELLER, J. B., Lichen Growth 157

LETTER TO THE EDITOR

TOGNETTI, K. and WINLEY, G., Stochastic Growth Models with Logistic Mean Population 167

Number 2, 21 January 1980

GLAGOLEV, A. N., Reception of the Energy Level in Bacterial Taxis . 171

HYVER, C., Stability of Transformation Systems Representable by Tree Graphs: Extension to Structures of Biological Importance . 187

COMINS, H. N., HAMILTON, W. D. and MAY, R. M., Evolutionarily Stable Dispersal Strategies 205

YAMAGUCHI, Y., KOMETANI, K. and SHIMIZU, H., A Theoretical Study of Synchronizations of Two Nyocardial Cells . . . 231

WRIGHT, M., Involvement of an "All-or-none Event" in the Triggering of Chromosome Segregation and of *S* Phase in Procaryotic and Eucaryotic Cells 249

FORTERRE, P., Model for the Supercoiling Reaction Catalysed by DNA Gyrase 255

VAN EYKELENBURG, C., FUCHS, A. and SCHMIDT, G. H., Some Theoretical Considerations on the *In Vitro* Shape of the Cross-walls in *Spirulina* spp. 271

ANDERSON, R. M., Depression of Host Population Abundance by Direct Life Cycle Macroparasites 283

EVANS, G. T., Diffusive Structure: Counterexamples to any Explanation? 313

SHARPE, P. J. H. and HU, L. C., Reaction Kinetics of Nutrition Dependent Poikilotherm Development 317

BULMER, M. G., The Sib Competition Model for the Maintenance of Sex and Recombination 335

Number 3, 7 February 1980

BASS, L., On the Location of Cellular Functions in Perfused Organs 347

CARLIN, R. K., Poly(A): A New Evolutionary Probe 353

KIRKWOOD, T. B. L., Error Propagation in Intracellular Information Transfer 363

RILEY, J. G., Strong Evolutionary Equilibrium and the War of Attrition 383

ÅGREN, G. I. and FAGERSTRÖM, T., On Environmental Variability and Limits to Similarity 401

KATZ, S. and SQUIRE, W., Metal Ion-protein Complex Formation: Buffer Competitive Effects 405

HALLAM, T. G., Effects of Cooperation on Competitive Systems 415

KIJIMA, H. and KIJIMA, S., Cooperative Response of Chemically Excitable Membrane II. Two state Models and Their Limitations 425

POTTEN, C. S. and MAJOR, D., Repeated Injection (Continuous Labelling) Experiments in Mouse Epidermis 465

GRAY, B. F., The Distribution of Heat Sources in the Human Head—Theoretical Considerations 473

TANEMURA, M. and HASEGAWA, M., Geometrical Models of Territory I. Models for Synchronous and Asynchronous Settlement of Territories 477

TOOMPUU, O. G. and SCHERBAKOV, V. P., Genetic Recombination: Formal Implications of a Crossed Strand-exchange between Two Homologous DNA Molecules 497

GINSBORG, B. L. and SEARL, J. W., On the Determination of the Concentration over a Sphere with a Barrier Layer . . . 521

SMITH, R. H. and MEAD, R., On Predicting Extinction in Simple Population Models II. Numerical Approximations . . . 525

LETTERS TO THE EDITOR

GOPALSAMY, K. and AGGARWALA, B. D., On the Non-existence of Periodic Solutions of the Reactive-diffusive Volterra System of Equations 537

PENNINCKX, M., Electrostatic Stabilization of Dipolar Transition States in Enzyme Catalyzed Transacylations. A Theoretically Plausible Mechanism 541

ANNOUNCEMENT 545

Number 4, 21 February 1980

ROUTLEDGE, R. D., The Form of Species Abundance Distributions 547

MURRAY, W. J., REED, K. W. and ROCHE, E. B., Conformations of Carnitine and Acetylcarnitine and the Relationship to Mitochondrial Transport of Fatty Acids 559

TAKIZAWA, N. and OONUKI, M., Analysis of Synapse Density in Cerebral Cortex 573

BROWN, A. H. D. and ALBRECHT, L., Variable Outcrossing and the Genetic Structure of Predominantly Self-pollinated Species . 591

COUSINS, S. H., A Trophic Continuum derived from Plant Structure, Animal Size and a Detritus Cascade 607

WERREN, J. H., GROSS, M. R. and SHINE, R., Paternity and the Evolution of Male Parental Care 619

CRAIG, A. G., The Formation of Chromosome Aberrations from Single-strand damage in Irradiated DNA 633

FLETCHER, C. R., The Relationship between Active Transport and the Exchange Diffusion Effect 643

STEIN, W. D., The Epigenetic Address: A Model for Embryological Development 663

GARDEN, P. W., Markov Analysis of Viral DNA/RNA Sequences 679

LETTER TO THE EDITOR

SIMON, I., and ASBÓTH, B., Subunit Contact Surface—an Additional Argument in Favour of Continuous Folding during Biosynthesis of Proteins 685

Index to Volume 82

Abundance distributions of species, the form of, 547
Acetylcarnitine and carnitine conformations and the relationship to mitochondrial transport of fatty acids, 559
Active transport and the exchange diffusion effect, the relationship between, 643
AGGARWALA, B. D. (see GOPALSAMY, K.), 537
ÅGREN, G. I. and FAGERSTRÖM, T., On environmental variability and limits to similarity, 401
ALBRECHT, L. (see BROWN, A. H. D.), 591
"All-or-none event", involvement in the triggering of chromosome segregation and of *S* phase in procaryotic and eucaryotic cells, 249
ANDERSON, R. M., Depression of host population abundance by direct life cycle macroparasites, 283
ANGULO, J. J., SMITH, T. L., TSOKOS, J. O. and TSOKOS, C. P., Population-dynamics models and a sequential test in the analysis of the influence of a household setting on the spread of *Variola minor*, 91
Animal size, plant structure and a detritus cascade, a trophic continuum derived from, 607
ANNOUNCEMENT, 545
ASBÓTH, B. (see SIMON, I.), 685

Bacterial taxis, reception of the energy level in, 171
Barrier layer, on the determination of the concentration over a sphere with, 521
BARTHA, F., On a criterion of instability for positive feedback control systems, 141
BASS, L., On the location of cellular functions in perfused organs, 347
Biosynthesis of proteins, an additional argument in favour of continuous folding during; subunit contact surface (letter), 685
BROWN, A. H. D. and ALBRECHT, L., Variable outcrossing and the genetic structure of predominantly self-pollinated species, 591
Buffer competitive effects: metal ion–protein complex formation, 405
BULMER, M. G., The sib competition model for the maintenance of sex and recombination, 335

CARLIN, R. K., Poly(A): a new evolutionary probe, 353
Carnitine and acetylcarnitine conformations and the relationship to mitochondrial transport of fatty acids, 559
Cellular functions, location in perfused organs, 347
Cerebral cortex, analysis of synapse density in, 573
Chain propagation, peptide, a molecular model of, 149
CHAPAIS, B. and SCHULMAN, S. R., An evolutionary model of female dominance relations in primates, 47

CHILDRESS, S. and KELLER, J. B., Lichen growth, 157
Chromatin, Mg^{2+} as a trigger of condensation–decondensation transition of, during mitosis, 41
Chromosome aberration formation from single-strand damage in irradiated DNA, 633
Chromosome segregation and *S* phase triggering in procaryotic and eucaryotic cells, involvement of an "all-or-none event" in, 249
COMINS, H. N., HAMILTON, W. D. and MAY, R. M., Evolutionarily stable dispersal strategies, 205
Competitive systems, effects of cooperation on, 415
Condensation–decondensation transition of chromatin during mitosis, Mg^{2+} as a trigger of, 41
Conformations of carnitine and acetylcarnitine and the relationship to mitochondrial transport of fatty acids, 559
Continuous labelling (repeated injection) experiments in mouse epidermis, 465
Cooperation, effects on competitive systems, 415
Cooperative response of chemically excitable membrane; two state models and their limitations, 425
COUSINS, S. H., A trophic continuum derived from plant structure, animal size and a detritus cascade, 607
CRAIG, A. G., The formation of chromosome aberrations from single-strand damage in irradiated DNA, 633
Crossed strand-exchange between two homologous DNA molecules, formal implications of; genetic recombination, 497
Crosswalls in *Spirulina* spp., some theoretical considerations on the *in vitro* shape of, 271

Detritus cascade, plant structure and animal size, a trophic continuum derived from, 607
Diffusive structure: counterexamples to any explanation?, 313
Dipolar transition states in enzyme catalyzed transacylations, electrostatic stabilization of; a theoretically plausible mechanism (letter), 541
Dispersal strategies, evolutionarily stable, 205
DNA gyrase, model for the supercoiling reaction catalysed by, 255
DNA, irradiated, the formation of chromosome aberrations from single-strand damage in, 633
DNA molecules, homologous, two, formal implications of a crossed strand-exchange between; genetic recombination, 497
DNA/RNA sequences, viral, Markov analysis of, 679
Dominance, female, in primates, an evolutionary model of, 47

Electron micrographs of randomly oriented particles, the reconstruction of structure from, 15
Electrochemical potential difference, protonic, mitochondrial, liver, and the thyroid gland: a novel hormone action?, 1
Electrostatic stabilization of dipolar transition states in enzyme catalyzed transacylations; a theoretically plausible mechanism (letter), 541

Embryological development, a model for; the epigenetic address, 663
Energy level in bacterial taxis, reception of, 171
Environmental variability and limits to similarity, 401
Epidermis, mouse, repeated injection (continuous labelling) experiments in, 465
Epigenetic address: a model for embryological development, 663
Error propagation in intracellular information transfer, 363
EVANS, G. T., Diffusive structure: counterexamples to any explanation?, 313
Evolution of male parental care, and paternity, 619
Evolutionarily stable dispersal strategies, 205
Evolutionary equilibrium, strong, and the war of attrition, 383
Evolutionary model of female dominance relations in primates, 47
Evolutionary probe, new: poly(A), 353
Exchange diffusion effect and active transport, the relationship between, 643
Extinction prediction in simple population models; numerical approximations, 525

FAGERSTRÖM, T. (see ÅGREN, G. I.), 401
Fatty acids, conformations of carnitine and acetylcarnitine and the relationship to mitochondrial transport of, 559
Female dominance relations in primates, an evolutionary model, 47
FLETCHER, C. R., The relationship between active transport and the exchange diffusion effect, 643
Folding, continuous, during biosynthesis of proteins, an additional argument in favour of; subunit contact surface (letter), 685
FORTERRE, P., Model for the supercoiling reaction catalyzed by DNA gyrase, 255
FUCHS, A. (see VAN EYKELENBURG, C.), 271

GARDEN, P. W., Markov analysis of viral DNA/RNA sequences, 679
Genetic recombination: formal implications of a crossed strand-exchange between two homologous DNA molecules, 497
Genetic structure of predominantly self-pollinated species, variable outcrossing and, 591
GINSBORG, B. L. and SEARL, J. W., On the determination of the concentration over a sphere with a barrier layer, 521
GLAGOLEV, A. N., Reception of the energy level in bacterial taxis, 171
GLICK, B. R., A molecular model of peptide chain propagation, 149
GOPALSAMY, K. and AGGARWALA, B. D., On the non-existence of periodic solutions of the reactive–diffusive Volterra system of equations (letter), 537
GRAY, B. F., The distribution of heat sources in the human head—theoretical considerations, 473
GROSS, M. R. (see WERREN, J. H.), 619
Growth of lichens, 157
Growth, stochastic, models with logistic mean population (letter), 167

HALLAM, T. G., Effects of cooperation on competitive systems, 415
HAMILTON, W. D. (see COMINS, H. N.), 205
HASEGAWA, M. (see TANEMURA, M.), 477

Head, human, distribution of heat sources in; theoretical considerations, 473
Heat source distribution in the human head—theoretical considerations, 473
Host population abundance, depression by direct life cycle macroparasites, 283
Household setting, influence on the spread of *Variola minor*, population-dynamics models and a sequential test in the analysis of, 91
HU, L. C. (see SHARPE, P. J. H.), 317
Human head, distribution of heat sources in; theoretical considerations, 473
HYVER, C., Stability of transformation systems representable by tree graphs: extension to structures of biological importance, 187

Information transfer, intracellular, error propagation in, 363
Instability criterion for positive feedback control systems, 141
Irradiated DNA, the formation of chromosome aberrations from single-strand damage in, 633

JERZMANOWSKI, A. and STARON, K., Mg^{2+} as a trigger of condensation-decondensation transition of chromatin during mitosis, 41

KAM, Z., The reconstruction of structure from electron micrographs of randomly oriented particles, 15
KATZ, S. and SQUIRE, W., Metal ion-protein complex formation: buffer competitive effects, 405
KELLER, J. B. (see CHILDRESS, S.), 157
KIJIMA, H. and KIJIMA, S., Cooperative response of chemically excitable membrane II. Two state models and their limitations, 425
KIJIMA, S. (see KIJIMA, H.), 425
KIRKWOOD, T. B. L., Error propagation in intracellular information transfer, 363
KOMETANI, K. (see YAMAGUCHI, Y.), 231

Lichen growth, 157
Logistic mean population, stochastic growth models with (letter), 167

Macroparasites, direct life cycle, depression of host population abundance by, 283
MAJOR, D. (see POTTEN, C. S.), 465
Male parental care, paternity and the evolution of, 619
Markov analysis of viral DNA/RNA sequences, 679
MAY, R. M. (see COMINS, H. N.), 205
MEAD, R. (see SMITH, R. H.), 525
Membrane, chemically excitable, cooperative response of; two state models and their limitations, 425
Metal ion-protein complex formation: buffer competitive effects, 405
Mg^{2+} as a trigger of condensation–decondensation transition of chromatin during mitosis, 41
Mitochondrial liver protonic electrochemical potential difference and the thyroid gland: a novel hormone action?, 1
Mitochondrial transport of fatty acids, conformations of carnitine and acetylcarnitine and the relationship to, 559

Mitosis, Mg^{2+} as a trigger of condensation–decondensation transition of chromatin during, 41
Molecular model of peptide chain propagation, 149
Mouse epidermis, repeated injection (continuous labelling) experiments in, 465
MURRAY, W. J., REED, K. W. and ROCHE, E. B., Conformations of carnitine and acetylcarnitine and the relationship to mitochondrial transport of fatty acids, 559
Myocardial cells, two, a theoretical study of synchronizations of, 231

OONUKI, M. (see TAKIZAWA, N.), 573
Outcrossing, variable, and the genetic structure of predominantly self-pollinated species, 591

Paternity and the evolution of male parental care, 619
PENNINCKX, M., Electrostatic stabilization of dipolar transition states in enzyme catalyzed transacylations. A theoretically plausible mechanism (letter), 541
Peptide chain propagation, a molecular model of, 149
Perfused organs, on the location of cellular functions in, 347
Plant structure, animal size and a detritus cascade, a trophic continuum derived from, 607
Poikilotherm development, nutrition dependent, reaction kinetics of, 317
Poly(A): a new evolutionary probe, 353
Population abundance, host, depression by direct life cycle macroparasites, 283
Population models, on predicting extinction in; numerical approximations, 525
Population-dynamics models and a sequential test in the analysis of the influence of a household setting on the spread of *Variola minor*, 91
Positive feedback control systems, on a criterion of instability for, 141
POTTEN, C. S. and MAJOR, D., Repeated injection (continuous labelling) experiments in mouse epidermis, 465
Primates, an evolutionary model of female dominance relations in, 47
Protein-metal ion complex formation: buffer competitive effects, 405
Proteins, an additional argument in favour of continuous folding during biosynthesis of; subunit contact surface (letter), 685
Protonic electrochemical potential difference, mitochondrial, liver, and the thyroid gland: a novel hormone action?, 1

Randomly oriented particles, the reconstruction of structure from electron micrographs of, 15
Reactive-diffusive Volterra system of equations, on the non-existence of periodic solutions of (letter), 537
REED, K. W. (see MURRAY, W. J.), 559
Regeneration, a serial threshold theory of, 105
Repeated injection (continuous labelling) experiments in mouse epidermis, 465
RILEY, J. G., Strong evolutionary equilibrium and the war of attrition, 383
RNA/DNA sequences, viral, Markov analysis of, 679
ROCHE, E. B. (see MURRAY, W. J.), 559
ROUTLEDGE, R. D., The form of species abundance distributions, 547

S phase and chromosome segregation triggering in procaryotic and eucaryotic cells, involvement of an "all-or-none event" in, 249
SCHERBAKOV, V. P. (see TOOMPUU, O. G.), 497
SCHMIDT, G. H. (see VAN EYKELENBURG, C.), 271
